JACKETS IN **SOFT-SHELL**

SOFT-SHELL 3 LAYERS

WATER RESISTANCE + BREATHABILITY = WATERPROOF

Our **SOFT-SHELLS** can be worn in the professional and sporty fields since their 3 layer fabric assures complete **water resistance** and the best breathability.

- an external water-proof outshell
- an inner breathable membrane
- a fleece lining in order to supply the final user with maximum comfort.

JRC socks are obtained with first-calibre and technologically leading edge yarns:
their combination has been engineered to guarantee the greatest functionality. Anatomically cushioned structures with differentiated density, protective padding, graduated compression provide maximum performance and anti-stress defatiguing effects.

LYCRA

This fibre can reduce muscle vibrations which are the primary cause of muscle fatigue, increasing sensitivity, precision and efficiency of movements with greater comfort and wearability.

POLYPROPYLENE

As a cutting edge fibre, polypropylene guarantees top-performing thermal properties; given its hollow-section structure, the average weight Is 40% lower than wool but with the same capacity to maintain body warmth. This translates into a compact volume, great lightness of garments and freedom of movements. Its hypoallergenic and antistatic properties make it totally wearable as a second skin even by epidermal sensitive individuals. It is breathable, stain-resistant and with very fast colours. It Is easy to wash and dry.
