CATALOGUE ICONOGRAPHY

EASE is a lightweight, custom engineered foam, proprietary to Cat Footwear. Compared to regular EVA and foam, EASE provides:

- 30% greater longevity by taking 30% less compression - it won't break down or compress
- 30% more energy return - giving you more bounce back
- Lightweight comfort - 10-15% lighter

Athletic inspired design, construction and engineering. ERGOLite is made for the worker who is required to wear safety footwear, but wants anything but.

A one-of-a-kind sole that delivers unsurpassed traction and makes ice obsolete so that you're sure-footed and moving forward when the temperature drops. Improves traction on wet, icy surfaces by 3x.

Powered by DUOFUSE™: Our custom engineered midsole blends rubber & foam for more comfort, less weight and trusted durability. With 40% more resilience and 30% more abrasion resistance than standard EVA it will stay comfortable while holding up to the daily beating they're going to receive.

Powered by SRX: our extreme slip resistant compound maximizes grip and traction to exceed global industry standards.

Faster. Thinner. Stronger. Nano Toe is a non metallic approved safety toe that is 40% lighter than steel and 15% lighter than composite toes, providing more space and comfort for your toes without sacrificing any protection.

iTechnology combines the durability of a Goodyear Welt with an athletic cup heel for athletic shoe comfort.

Cat Footwear manufactures premium, safety footwear symbolizing a 100-year connection Caterpillar has to tough, honest work. Our safety footwear collection includes a variety of comfort, durability, safety and technology features intended to keep workers protected and comfortable in the harshest of conditions.

EN

Our safety footwear is tested to meet and exceed strict EU standards from authorized testing facilities such as SATRA and receives certification in one of the following categories:

**EN ISO
20345:2011**
